## **THE ILLUMINATION PROCESS**

The Illumination Process is the core energetic healing process Jaqi uses. It brings about healing at the blueprint level of our being. When these imprints are erased, we can more readily change negative emotions and behaviours. The power of the immune system is unleashed, so that physical healing is accelerated. Every imprint in our Luminous Energy Field is linked to a chakra where it releases its toxic data into the central nervous system. The Illumination Process transforms heavy energies into light. This is also a metaphor for saying that it transforms emotional wounds into sources of power and knowledge. When toxic energies in a chakra are combusted, the natural seeds of that chakra can grow. When fear no longer lives in our belly, compassion blossoms, when scarcity no longer resides in our first chakra, we experience the abundant love of the Universe. When grief no longer dwells in our third chakra, we can change our world.

## **SOME OF THE BENEFITS OF THE ILLUMINATION PROCESS**

- Less reactivity to various situations and life events that formerly would have been emotionally upsetting
- Feelings of expanded lightness, awareness, and connection with our Higher Self and all living things

- Improved clarity and heightened ability to perceive ourselves and others objectively, without the distortion of old programming
- An increased ability to receive guidance from our Higher Self and other Guides
